NOTICE TO DATA USERS

Canada-U.S. Import Data Exchange

On January 1, 1990, Canada entered into a Memorandum of Understanding with the United States concerning the exchange of import data. To eliminate the trade data discrepancies between the two countries, Canada and its major trading partner are now using each other's import statistics in place of their respective export data.

This data exchange has resulted in higher export values for most of the commodity categories which are traded to the United States. The increases are attributable to:

- **Improved Coverage**, since import documents are subject to more rigorous control than exports due to the management of tariffs and the enforcement of trade agreements. The resulting increase has been estimated at 3.1% and 4.9% of total export trade to the United States in 1988 and 1989, respectively.

- **Valuation of products exported to the United States on a port-of-exit basis**, as compared to a place-of-lading basis prior to 1990. Thus, Canadian exports to all countries are now on the same basis. The valuation change has resulted in an increase of 2% to 3% in the overall export trade total.

- **Inclusion of the U.S. Virgin Islands and Puerto Rico in Canadian/United States trade**. These territories were published as separate entities prior to 1990. The value of merchandise export to these regions was $256 million in 1988 and $206 million in 1989.

Also as a result of the MOU, new Customs regulations eliminating the requirement of filing export documents for shipments between Canada and the U.S. took effect during 1990.

Unification of Germany

Trade with **East Germany (Democratic Republic of Germany)** and **West Germany (Federal Republic of Germany)** is published together in this report under the description **Germany**. Such trade is attributed to the geographical region of Western Europe and the **European Economic Community** where applicable. Previous statistics were published as separate entities, with East Germany's trade attributed to the geographical region of Eastern Europe.

APPENDIX

1989 Production Estimates, Alberta and Canada	124
1990 Production Estimates, Alberta and Canada	125
International Trade Classification of Countries	126
Index of Commodities	129
Index of Countries	131

INTRODUCTION

This report presents domestic export statistics for agricultural products during calendar year 1990. It provides estimates of out-of-province exports and out-of-country exports. The latter, reported on a Customs basis, are presented in two sections, the first detailing exports by commodity and the second detailing exports by country of destination.

International, or out-of-country, export statistics are compiled by Statistics Canada according to the "General" system of trade defined by the Statistical Office of the United Nations. Under this system, domestic exports encompass all goods grown, extracted or manufactured in Canada, including goods of foreign origin which have been materially transformed in Canada.

Exports are, in principle, valued or recorded at the values declared on export documents which usually reflect the transaction value or the actual selling price. Canadian exports to overseas countries are valued at "Free on Board" port of exit, including freight charges to that point but net of discounts and allowances. **Prior to 1990, Canadian exports to the U.S. were valued F.O.B. point of lading net of freight charges, discounts and allowances (refer to "Notes to Data Users").**

SOURCES AND METHODS

The out-of-province export estimates in this report represent shipments to other Canadian provinces as well as out-of-country exports. They were generally derived by subtracting apparent provincial consumption from provincial production. The methodology involved the use of data from a variety of sources, ranging from government publications to private industry contacts.

Primary out-of-country exports were obtained from the International Trade Division of Statistics Canada. Supplementary statistics were mainly from provincial government sources. In a number of cases adjustments and revisions to Statistics Canada's export data were required to overcome inaccuracies resulting from the attribution of exports on a province of lading basis rather than by province of origin.

OUT-OF-PROVINCE SHIPMENTS

The estimated value of out-of-province shipments rose in 1990 by 8 per cent to $3,961.4 million, from $3,675.2 million in 1989. The increase was mainly the result of a $159 million rise in grain and oilseed shipments. Due largely to this increase, grains and oilseeds constituted 47 per cent of the total value of agricultural shipments in 1990, up from 46 per cent in 1989.

Meat and animal products accounted for 29 per cent of the value of shipments, with live animals representing a further 11 per cent. Forage seeds and other crops and crop products accounted for another 11 per cent. Peat moss and beverages constituted the remaining two per cent of shipments.

EXPORT OVERVIEW

The value of Alberta's 1990 out-of-country exports of primary and processed agricultural products was estimated at $2,692.2 million. This represented about 73 per cent of out-of-province shipments. In 1989, out-of-country exports totalled $2,081.1 million, representing 57 per cent of the out-of-province shipments for that year. Significant increases occurred in exports of wheat, pork, live cattle, whiskey, and raw hides and skins. However, substantial decreases in hog, oat, seeds for sowing and oilseed cake and meal shipments were also recorded.

Alberta's live cattle export value increased in

1990 to $250.8 million from $146.6 million in 1989. This resulted from a sharp rise of some 129,000 head in sales volume owing to relatively high prices and demand in the United States of America. Despite this increase, Alberta's share of Canadian cattle exports fell to 31 per cent from the previous year's level of 34 per cent.

Exports of pork rose in 1990 by 148 per cent in value to about $84.9 million in spite of the U.S. countervail duty that was instituted a year earlier. However, live hog export sales were down to $35.3 million, about 38 per cent lower than the 1989 total of $56.6 million.

Exports of raw hides and skins increased by 21 per cent to $116.2 million, with Taiwan and S. Korea as the two leading markets and the U.S. a distant third. Wheat exports, valued at $1,037.7 million, were up 81 per cent from a year earlier and, thus, remained by far Alberta's most important agricultural export commodity, accounting for almost 39 per cent of total export revenue. The 1990 increase marked a return to more normal export levels following severe drops in shipments to the U.S.S.R. and China (PR) in 1989.

Oat export value fell from the 1989 level of $87.6 million to $52.2 million due to reduced shipments to the U.S. Barley exports rose to $366.9 million from $291.1 million while canola/rapeseed shipments dropped in value by $24 million to $229.7 million.

TRADING PARTNER REVIEW

Alberta's major agricultural export markets have traditionally included the United States, Japan, the USSR and, to a lesser extent, the People's Republic of China, Saudi Arabia, South Korea and Taiwan. In 1990, these seven countries accounted for $2,141.6 million worth of shipments, fully four-fifths of the total out-of-country export value for the year.

United States of America

The U.S. was Alberta's most important customer in 1990 as in previous years, purchasing $756.7 million worth of agricultural commodities, a rise of 24 per cent from 1989. **While shipments of many products were up, the increase was due in part to data source changes which resulted in improved data capture and higher values due to the inclusion of freight in the valuation process. (Refer to "Notes To Data Users".)**

Beef exports rose by $13.1 million to $78.1 million mainly as a result of a 14 per cent increase in sales volume. Total feeder and slaughter cattle exports nearly doubled from 147,767 to 274,028 head but oat exports were down from $80.9 million in 1989 to $47.6 million, with quantities dropping from 486 472 tonnes to 398 320 tonnes.

Exports of pork rebounded after persistent problems in the packing industry, along with countervail duties, had led to a 33 per cent decraese in 1989. Tonnage rose 99 per cent in 1990 to 30 258 tonnes. Noteworthy increases also occurred in whiskey, processed meat and canola oil exports.

Japan

Japanese imports of agricultural commodities from Alberta were estimated at about $577.5 million, compared with $528.6 million and $471.6 million in 1989 and 1988, respectively. Canola seed, at a value of $223.7 million, was the single most important commodity, accounting for nearly 39 per cent of the total 1990 export value and advancing some $13 million from 1989.

Barley shipments to Japanese markets rose markedly to 530 103 tonnes, from 395 881 tonnes in 1989, because of lower international prices

and improved demand. The total shipment value of $71.4 million was over 28 per cent higher than the 1989 value. Significant advances were also achieved in shipments of wheat and dehydrated alfalfa to the Japanese market

People's Republic of China

Alberta's exports of agricultural commodities to China (PR) in 1990 totalled $284.8 million, up from $118.8 million in 1989. The main reason for this increase was the return of wheat exports to a more normal $279.3 million following a dramatic drop in 1989. However, barley shipments dropped in value from $14.2 million to $4.2 million while canola oil shipments declined to $1.1 million from $9.8 million in 1989.

Other Asia

Other Asian markets of significance to Alberta in 1990 included South Korea, Taiwan, Bangladesh, the Philippines, and Indonesia in that order of importance. Agricultural exports to these countries were worth $187.6 million, up from $146.8 million in 1989. The major commodities exported to the region included wheat and raw hides and skins.

U.S.S.R.

Exports to the U.S.S.R. in 1990 amounted to $323.4 million, up markedly from $126.9 million the preceding year The main reason for the increase was a jump in wheat sales to 1 228 188 tonnes from 420 790 tonnes in 1989. Another reason, was a sharp rise in barley exports, to 581 196 tonnes ($73.5 million) from 114 622 tonnes ($15.7 million).

Western Europe

Exports to Western Europe totalled about $130.8 million, down from a 1989 total of $127.1 million. Italy, the United Kingdom and Belgium/Luxembourg with $28.4 million, $25.6 million and $20.8 million worth of purchases, respectively, were the major markets. Wheat was by far the most important commodity, making up over 40 per cent of the total export value. Horsemeat was also important, totalling some $17 million, or 13 per cent of total shipments.

Middle East

Shipments from Alberta to the Middle East decreased to $224.2 million from a 1989 level of $254.6 million, mainly because of the Persian Gulf crisis. Exports to Saudi Arabia and Iraq were down 17.3 per cent and 46.8 per cent to $95.1 million and $36.3 million, respectively. However, on the positive side, exports to Kuwait climbed from $8,000 to $12.7 million. Notable among the commodities shipped to the Middle East were wheat, barley, wheat flour, and peas.

Other Africa

Alberta's agricultural exports to this region in 1990 more than doubled from 1989 levels to $70.7 million. Even though shipments to many of the countries in the region were up sharply, the major reason for the overall increase was a $23 million rise in shipments to South Africa.

South and Central America

Agricultural exports to South and Central America from Alberta in 1990 were worth $119.6 million, down 25 per cent from 1989. Mexico, Cuba, Colombia and Brazil were the region's most active importers. Heading the list of commodities imported were wheat ($84.7 million) and canola ($24.2 million).
